Career Objective:

Frontend software engineer with 5 Years experience in developing and deploying solid and scalable digital products that are delightful and seamless to use. My aim is to expand my knowledge and abilities by working in a dynamic organization that's passionate about problem solving and employee's growth and development.

Technical Skills:

Languages: JavaScript/TypeScript.

Technologies/Frameworks: Vue JS, Nuxt JS, React JS, Next JS, Typescript, GRAPHQL, Tailwind CSS, SCSS, Vuetify, BootstrapVue, and Node JS, Nest JS.

Databases: MongoDB.

Cloud Services: Heroku, Netlify, Onrender.

CI/CD Tools: Github Actions.

Other:: System Design, Data structure and Algorithms.

Experience:

Farmz2U Ltd Lagos, Nigeria

Frontend Software Engineer - January 2020 to March, 2021

- Developed and maintained web application with a team, utilizing JavaScript and its Frameworks namely; React JS, Next JS, Vue JS, and Nuxt JS.
- Applied Design-Develop-Deploy approach to define and implement project's scopes and timelines.
- Built web applications that are geared for Search Engines and also integrated REST APIs.
- Tested and troubleshoot applications to check for problems and ensured that the program is optimized and solid.

Projects:

Farming Management Platform/Farming Vendors Platform.

- Contributed to the development, deployment, and maintenance of the user's interface of the platform.

- Played a part in setting up business features that authorized farmers to create products, set up product pricing, and track product sales
- Developed a system that enabled farmers to showcase their agricultural products to potential end users.
- Developed a system that enabled farmers hire farm implements during their planting and harvesting seasons.

MyCoverGenius, Lagos, Nigeria:

Frontend software Engineer. (Vue Js, Nuxt 3, Ant Design, Typescript) - April 2021 to June , 2022

- Take ownership of frontend features or user stories within the insurance MyCover Genius web applications. Successfully deliver assigned features according to the defined timelines, with a focus on quality and adherence to UI/UX design guidelines. Aim for a 90% or higher completion rate of assigned frontend tasks by the end of the quarter
- Enhance communication and collaboration with cross-functional teams, including design, backend development, and product management. Participate in bi-weekly sprint planning meetings and provide valuable input on frontend requirements and implementation strategies.
- Efficiently address frontend bugs reported by QA or end-users. Aim to resolve reported bugs within 24 hours of assignment, with a focus on thorough testing and regression prevention. Decrease the average time to resolve frontend bugs by 20% compared to the previous quarter.
- Proactively identify opportunities to enhance user experience within the insurance company's web applications. Propose and implement UI/UX improvements based on user feedback or usability testing results. Aim for a 15% increase in user satisfaction scores related to frontend interactions.
- Contributed to developing and maintaining My Cover digital products which includes; MyCoverAI website, My CoverGenius website, and My Cover Genius business dashboards.

Edukoya. Lagos Nigeria.

Fronted software Engineer.(React Js, Vue Js, Tailwind CSS, Typescript) - September 1, 2022 to September 29, 2023

- Streamline frontend build and deployment pipelines to reduce build times and enhance release efficiency. Implement caching strategies, code splitting, and other optimization techniques to achieve a 20% reduction in average build times for frontend applications.
- Decrease the average page load time of key pages within Edukoya's platform by 20%, ensuring swift access to educational resources for users across different devices and network conditions.
- Contributed to developing and maintaining Edukoya's digital products which includes; Learners Application, Tutors Application and official website.

Shuttlers Metropolitan Mobility Company Lagos, Nigeria

Software Engineer June 2023 - March 2024

Technologies & Tools: React Js, Next Js, Vue JS, Nuxt JS, Tailwind CSS, BootStrapVue, and TypeScript.

Diminished the numbers of production bugs by writing Type-Safe codes and utilizing SonarCloud services.

Prevented security breach on Shuttlers ecosystem through adequate users' authentication and authorization.

Projects:

Admin Dashboard.

- Fully automated Shuttlers services through developing and deploy essential business features
- Configured widget test for the core components of registration, login, booking, viewing, and cancellation of ticket(s), tracking a trip, and funding a wallet on customer app.

Vehicle Partners Portal.

- Developed and maintained the partner's portal by implementing core business features to keep track of partners vehicles, drivers, trips, routes, and earnings.

Shuttlers Website.

- Integrated Zoho CRM chat system to enable customer interaction with the

operations team

- . Refactored parts of website User Interface to improve users experience while using the services.

Customer Web Application.

- Contributed to setting up features that allowed users to book trips, create events, fund wallet, and make charter requests.

Storipod, Nigeria
